Louvers

SOUND INSULATING

WATER RESISTANT

WIND RESISTANT

Our bioclimatic louvers not only rotate— in a closed position they also rest fully on the gutter profiles, making the roof completely draft-free. And thanks to the sound-absorbing foam inside, the sound of the rain is much less noticeable.

Louvers create a natural bio-climate with the breeze passing through.

The louvers automatically assume the correct position using pre-programmed scenes in the app.

Louvers close automatically in case of rain or snow. No water penetrates.

Always enough shade because the louvers automatically follow the position of the sun.

Exceptional Technology with Tasteful Design

Standard pergola frame & louver colors:

Signal White - RAL 9016 ST

Anthracite Grey - RAL 7016 ST

Jet Black - RAL 9005 ST

Louver wood tone upgrade options:

Oak Nature

Oak Light Grey

Oak Dark Brown

Prefer a different color?
We can **customize** one for you.

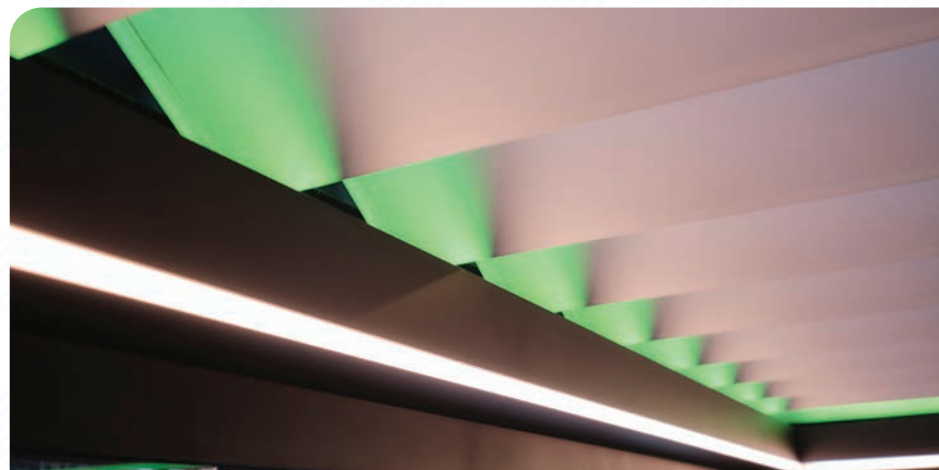

Lighting

Illumination for every Occasion

With our built-in LED lighting, you can always create the perfect atmosphere— from cool white (6,500K) for quietly reading a book by the pool, to warm white (2,700K) or festive colored lights for a night of entertainment.

OPTIONS:

-  Dimmable LED strip with direct (warm) white lighting
-  Dimmable LED strip with direct white lighting: adjustable cool - warm white
-  Indirect RGB & LED white lighting
-  Dimmable spotlights
-  Dimmable LED Starlight

Dreamy Starry Sky

Our Pergola is a great place to spend a twilight evening. Recline, relax and drift away as dozens of twinkling LED lights create a dazzling starry sky.

Modern Comforts, Always Nearby

Remotes or built-in button controls are available upgrades.

App Control

Gorgeous weather at your fingertips— using a patented, intelligent louver system, our app calculates the correct position for the louvers to cater to your preferences. Any change in incoming light causes the louvers to adjust automatically, maintaining the perfect ambiance.

Heating

Want it warmer during colder months? The powerful 2600W infrared heating makes a world of difference in just a few minutes.

USB and 110V Connections

So you can charge your laptop, phone or power your outdoor kitchen and bar. These are neatly incorporated into the leg poles and are also waterproof and resistant to dirt and vermin.

Bluetooth Sound System

Ready for surround sound? With integrated speakers in the poles, you can stream your favorite tunes from your smartphone via Bluetooth. Comes with 2 or 4 built-in speaker options.

Projector Holder & Screen

You can also project films or sports events in big-screen format with our projector holder and integrated screen.

Walls and Closures

Create your Cocoon of Comfort and Character

You can close off your pergola on all sides with any (or a combination) of these options:

-  Built-in screen
-  Outdoor curtains
-  Fixed window (aluminum or steel-look, insulating double-glazed)
-  Fixed wall (wooden)
-  Motorized louvered wall
-  Sliding wall (wooden, double screen fabric, or glass)
-  Sliding window (aluminum, insulating double-glazed)
-  Perspective “guillotine” window

These closures not only give you panoramic views, they also provide shelter from UV rays, rain, wind and cold.

Built-in Solar Screens

Large windows let in lots of sunlight and heat. Our built-in, weather-resistant screens regulate the temperature and avoid the greenhouse effect during hot days by blocking up to 85% of the sun's heat without completely darkening the space. When fully closed, the screens also keep out mosquitoes and other annoying insects.

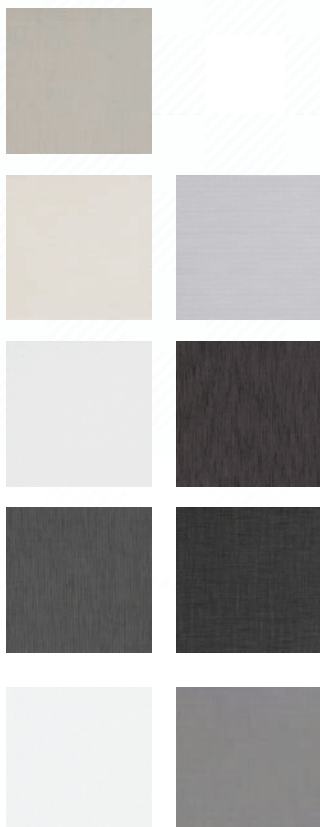

Not using the screens for a while? Then they can be integrated into the structure of the pergola and made completely *invisible* when fully raised.

Imagine It, We'll Make It.

Custom Printing

Screens are the most popular option for closing off a Pergola. Our screen fabric is available in a variety of colors with different degrees of openness (1%, 3%, 5% and 10%). But when simple color options are not enough, we can print **any** design on your screen. The only limit is your imagination.

Standard Colors

Custom Prints

Outdoor Curtains

A romantic and homely touch for your pergola? Pinch pleat or Ripplefold curtains on the inside create an extra decorative touch and provide privacy when needed. You can select fabrics from our catalog or provide your own.

Decorative Pillows

The simplest, most effective element for adding color, pattern, texture and style to a space, we create covers for all types of pillows using durable, washable fabric. Custom printing is also available.

Customization Options

✓ ALREADY INCLUDED

Just the roof

Freestanding versions

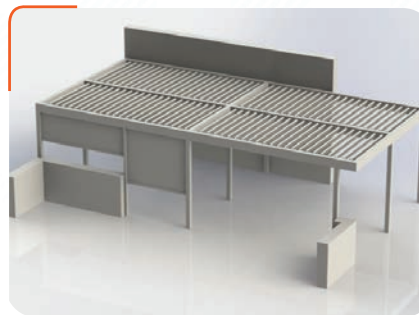

Built-on versions (with 1 to 3 posts + wall support)

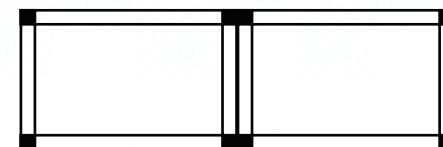

Integrated patio roof (no pillars)

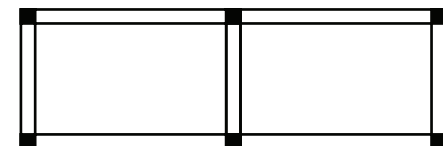

Coupled versions (with 2 or more modules)

Coupled versions can have pergolas assembled side-by-side...

...or have them share common poles.

Technical Specs

Maximum Pergola Dimensions

Single Unit

- 19'8" L x 14'9" W
- 21' L x 13'1" W

Coupled

- 20'9" L x 13'9" W

Water drainage

6,086 ounce or 10.76 sq.ft./hour as per European standard NBN EN 12056-3*

Snow load

Varies from **15.33 lb/sq.ft to 46 lb/sq.ft.** depending on the dimensions. Snow sensors are advised for snowy areas.

- With a load of greater than 5.11 lbs/sq.ft, no water tightness is guaranteed, and there is a risk of damage due to frost during long frost periods
- For a load greater than 25.56 lbs./sq.ft, wall mounting must be provided

Wind Resistance

- Structure & louvers
 - Up to 172 sq.ft. and widths less than or equal to 118": gusts of wind to **75mph***
 - For all other cases: **up to 62mph***
- Screen
 - Up to 108 sq.ft: **31 mph**
 - If greater than 108 sq.ft: **24 mph** (wind sensor pulls up the screen)

*Certain conditions must be met.

Maximum Height

Free standing pergola: 9'10"

Attached to the facade with **NO** walls, screens or side elements: 11'5"

A beautiful outdoor space to enjoy the whole year round

Made by the people who best know how
